

Installation note

for Windows Vista and Windows 7 operating systems.

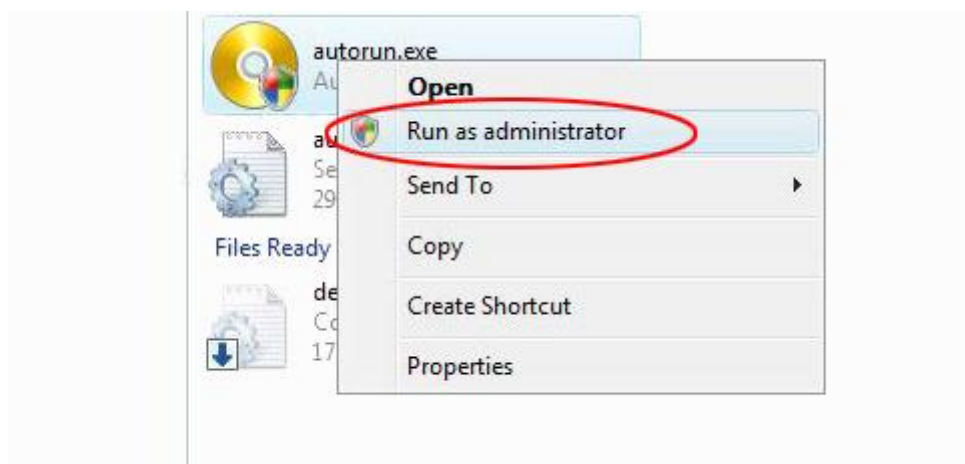

For software set up administrator privileges are requested.

If the operative system prevent the software to open:

1. Re-start the PC as user with administrator privileges.
2. Insert the CDRom and, at the following window, choose the voice "*Open folder to view files*".

3. In the following window, right click on the file "*Autorun.exe*" and choose "*Run as administrator*":

4. Proceed following the instructions supplied in the section "Documentation".
